

Shooting Range Log — User guide

Checkout, check-in, members and weapons — with and without a scanner

1. Getting started — operator, menu and scanner
2. Checkout — lending a weapon out
3. Check-in — taking a weapon back
4. Members
5. Weapons
6. Quick reference

1. Getting started

The app handles lending out the club's weapons. Four header buttons cover the daily work: Checkout, Check-in, Members and Weapons. Everything else lives in the menu on the far right.

Pick an operator

The operator is the staff member at the computer. Every checkout, check-in, debt and service entry is stamped with that name, so the choice comes before anything else. The dialog opens by itself at launch.

The operator dialog opens at launch and whenever no operator is set.

- 1 Search by name if the list is long.
- 2 Tap your name. It then shows in the menu button at the top right.

After a period of inactivity the operator is logged out and the dialog returns. The delay is set under Settings → Misc.

The menu

The menu button on the far right shows who the current operator is. It also holds logs, statistics, maintenance, dark mode, fullscreen and this guide.

The menu — the button carries the operator's name.

- 1 Menu button: shows the operator's name.
- 2 Tap the name badge to switch operator.
- 3 Switch between Swedish and English.
- 4 Open this guide as a PDF.

With or without a scanner

Everything can be done with a finger on the touch screen. With a barcode or QR reader attached the same work goes faster: the reader types the code for you and the app reacts at once. The scanner needs no field of its own — aim and shoot anywhere on the checkout or check-in screen.

- A weapon label scans as a weapon ID, exactly like typing the number.
- A member card holding a personnummer identifies the member, exactly like picking the name from the list.
- The scanner is switched on under Settings → Scanner. With it off, everything works as described in the steps, using the keypad and the lists.

2. Checkout

A checkout can start from either end — the weapon or the member. Weapon first is the fastest and what the screen opens on: type or scan the weapon's ID (the number on its label) and the app suggests who is likely to borrow it. Start with the member instead — scan an ID card carrying a personnummer, or search the name — and that member's assigned weapon is filled in for you.

- Weapon first: type or scan the ID, the borrower is suggested.
- Member first: scan the personnummer or pick the name, the weapon is filled in.

The screenshot shows the 'Checkout' screen of the Shooting Range Log app. The top navigation bar includes 'Checkout' (highlighted), 'Check-in', a clock showing '08:42:37', and a user profile 'Karin Ek'. The main content area features a keypad for entering a 'Weapon ID' (labeled with a red '1'), a numeric keypad (with a red '2' over the '2' key), a 'Check out' button, and a 'Manual choice' button (labeled with a red '3'). There is also an 'Enter member ID' field.

The checkout screen before anything is selected.

- 1 Type the weapon ID on the keypad — or scan the label.
- 2 With the scanner on, scanning is enough; the digits fill in by themselves.
- 3 Manual choice opens the full form when you would rather search by name.

Suggested borrowers

Once the weapon is known, up to two suggestions appear: the member the weapon is assigned to, and whoever borrowed it last. Tap the right person, then Check out — that is the whole flow.

The interface displays a numeric keypad for entering a weapon ID. A red circle with the number '1' is positioned above the keypad. To the right of the keypad, two member suggestions are listed: 'Smith & West' (red circle '2') and 'Maja Holm' (red circle '3', labeled 'ASSIGNED'). Below these, 'Petter Råå' (red circle '4', labeled 'LAST USED') is shown. A 'Manual selection' button is located at the bottom right. The top navigation bar includes 'Checkout', 'Check-in 2', the time '08:42:38', 'Members', 'Weapons', and a user profile 'Karin Ek'. A red circle with the number '5' is positioned above the 'Check out' button.

Weapon 36 typed in: the assigned member and the last borrower are offered.

- 1 The weapon ID you typed or scanned.
- 2 The weapon found — brand, model, caliber and ID.
- 3 ASSIGNED: the member this weapon belongs to. Preselected.
- 4 LAST: whoever borrowed it most recently.
- 5 Check out completes the loan.

With a scanner: scan the weapon, then the member's personnummer. If that member is one of the suggestions the checkout completes with no further taps. Any other known member lands on the form with both weapon and member filled in.

Member first

Scanning an ID card with a personnummer while no weapon is selected jumps to the form with that member filled in and picks their assigned weapon. With no assigned weapon, the one they borrowed last is picked instead — but only if it is in. Picking the member from the list before any weapon is selected does the same.

- An assigned weapon is picked even when it is out — a warning then names the current holder so you can choose another.
- The last-borrowed weapon is only suggested when it is in and the member has no assigned weapon.
- An unknown personnummer opens the guest dialog with the number filled in.
- A personnummer belonging to a deactivated member gives an error and selects nothing.

Order does not matter: scan the weapon first and then the personnummer and the checkout completes immediately if that member is the weapon's assigned or last borrower. Scan the personnummer first and the weapon fills in, and you confirm with Check out.

The form

Manual choice (or an unknown borrower) opens the form with two cards: member on the left, weapon on the right. Tap a card to change what it holds.

The screenshot shows a mobile application interface for a shooting range log. At the top, there is a header bar with a 'Checkout' button, a 'Check-in' button with a green dot, a clock showing '08:42:47', and tabs for 'Members' and 'Weapons'. A user profile 'Karin Ek' is visible in the top right. The main area is divided into two columns: 'Member' on the left and 'Weapon' on the right. The 'Member' card displays 'Maja Holm' with a red circle '1' next to it and 'Last shooting date: 2026-09-07'. The 'Weapon' card displays 'Smith & Wesson Model 686, .357 Magnum [36]' with a red circle '2' next to it, a yellow '★ ASSIGNED' tag, and 'Last: Petter Råå · 2026-09-01'. A red circle '3' is at the top of the 'Weapon' card. A red circle '4' is at the bottom left with the text 'Assign weapon to member'. A blue bar at the bottom contains a red circle '5' with the text 'Check out'.

The form with member and weapon selected.

- 1 Member card — tap to search for another member.
- 2 Weapon card — tap to pick another weapon.
- 3 Guest: for visitors who are not members.
- 4 Assign the weapon to the member — tick if it should become their own.
- 5 Check out finishes.

Brand

Caliber

☐ Available only

☐ Unassigned only

2

Checkout

- 1 Keypad for the weapon ID.
- 2 Filter by brand, caliber, available only or unassigned only.
- 3 Coloured chips show the weapon's condition and who it is assigned to.
- 4 Weapons that are out sit at the bottom, greyed, with their current borrower.

Picking a member from the list

The member picker — search by name, debt shows at a glance.

- 1 Search by name; otherwise the list is sorted by last shooting date.
- 2 A red badge marks an unsettled debt.

Guests

A visitor who is not a member is created as a guest straight from checkout. The personnummer identifies the guest, so the same person is reused on their next visit.

Guest checkout — pick a previous guest or add a new one.

- 1 Previous guests — search and tap.
- 2 New guest: personnummer and name.
- 3 Continue returns to checkout with the guest selected.

An administrator can later promote a guest to a full member under Maintenance → Guests.

Warnings

The app never blocks silently — it says why something should perhaps not go out. Condition markings, an unsettled debt, an inactive member or a weapon that is already out all show in orange or red on the card.

NEEDS CLEANING

Weapon is tagged: Needs cleaning — Rengörs efter helgen.

Check out

The weapon is marked 'Needs cleaning' with the technician's comment.

Receipt

After checkout a confirmation shows for five seconds and the screen resets for the next borrower.

Confirmation after checkout.

3. Check-in

The check-in screen lists every weapon that is out right now, one card per loan. The number in the header is the count of open loans.

The screenshot shows the 'Check-in' screen of the Shooting Range Log application. At the top, there are tabs for 'Checkout', 'Check-in' (selected), 'Members', and 'Weapons'. A user profile 'Karin Ek' is visible in the top right. The main heading is 'Checked-out weapons'. Below this, there are three weapon cards. The first card shows 'CZ Shadow 2, 9 mm' by Anna Lind, checked out on 2026-09-10 06:41, with a red '1' in a colored stripe and four red buttons labeled 2, 3, 4, and 5. The second card shows 'Walther GSP, .22 LR' by Erik Sund, checked out on 2026-09-10 07:41, with a green '42' in a box and four icons: a star, a red button, a tag, and a green arrow. The third card shows 'Smith & Wesson Model 686, .357 Magnum' by Maja Holm, checked out on 2026-09-10 08:42, with a green '36' in a box and four icons: a star, a red button, a tag, and a green arrow. In the top right corner, there is a red '6 return' button.

Weapons on loan, with per-loan buttons.

- 1 The weapon ID in the coloured stripe.
- 2 Star: assign the weapon to this borrower.
- 3 Coins: add or settle a debt.
- 4 Tag: mark the weapon's condition.
- 5 Arrow: take the weapon back — the loan closes.
- 6 Quick check-in: type a weapon ID instead of hunting through the list.

With a scanner: scan the weapon's label and it is checked in at once, wherever it sits in the list. Scanning a weapon that is not out jumps to checkout instead, with that weapon filled in.

Quick check-in

Quick check-in — type the weapon ID.

- 1 Type the weapon ID.
- 2 Check in closes the loan.

Debt

The screenshot shows the 'Shooting Range Log' application interface. At the top, there are tabs for 'Checkout' and 'Check-in' (with a green indicator), a clock showing '08:43:46', and links for 'Members', 'Weapons', and a user profile 'Karin Ek'. Below the tabs, a section titled 'Checked-out weapons' lists three items: '23 CZ Shadow 2, 9 mm' by Anna Lind, '42 Walther GSP, .22 LR' by Erik Sund, and '36 Smith & Wesson Model 686, .357 Magn' by Maja Holm. A 'Quick return' button is on the right. A modal window titled 'Debt for Erik Sund' is open in the foreground. It contains an 'Outstanding' section with a red circle '1' next to a red pill icon. Below this is an 'Amount' section with a red circle '2' next to a numeric input field showing '120'. To the right of the amount is a 'Reason' text input field with a red circle '3' next to a 'Settle' button. At the bottom of the modal, the text '120 kr · Ammunition' is displayed with a red circle '4' next to it.

Debt for a borrower.

- 1 Outstanding amount.
- 2 Amount in whole kronor.
- 3 Add debt saves the entry.
- 4 Settle marks an earlier debt as paid.

Condition markings

Anyone can mark a weapon's condition — no administrator needed. The markings follow the weapon and show up in pickers, lists and at checkout.

Tags for a weapon.

- 1 Tap the markings that apply.
- 2 Write a comment for whoever handles the weapon next.
- 3 Save.

Details and shooting history for a member.

Editing a member

The screenshot shows the 'Edit member' form in the Shooting Range Log application. The form is overlaid on a table of members. The form fields are: Name (required, marked with a red circle 1), Assigned weapon (dropdown menu, marked with a red circle 2), Email, Phone (marked with a red circle 3), Address, SSN, and Notes. There are 'Cancel' and 'Save' buttons at the bottom. The background table shows members like Anna Lind, Erik Sund, Johan Berg, Karin Ek, Maja Holm, and Petter Råå, each with a 'Debt' and 'Edit' button. The top navigation bar includes 'Checkout', 'Check-in', '08:42:25', 'Members', 'Weapons', and a user profile 'Karin Ek'.

The edit form.

- 1 Name is required; every other field is optional.
- 2 Assigned weapon — a weapon can belong to one member only.
- 3 Administrator grants access to settings and sensitive actions.
- 4 Deactivate rather than delete: the history stays.

Members are never deleted. A deactivated member shows as 'name [disabled]' in logs and lists, and all history remains.

5. Weapons

The weapon list shows the club's weapons with ID, brand, model, serial, caliber, assignment and condition.

The weapon list.

- 1 Search by brand, model or serial.
- 2 Filter by condition marking or unassigned weapons.
- 3 Show inactive weapons.
- 4 New weapon.
- 5 The tag button opens the condition markings.
- 6 Service opens the weapon's service log.

Editing a weapon

The screenshot shows the 'Edit weapon' modal form. The form has the following fields and instructions:

- ID ***: A text input field with the value '12'. A red circle with the number '1' is next to it.
- Brand**: A text input field with the value 'Glock'. A red circle with the number '2' is next to it.
- Model**: A text input field with the value '17'. A red circle with the number '2' is next to it.
- Serial number**: A text input field with the value 'GL-100'. A red circle with the number '3' is next to it.
- Caliber**: A text input field with the value '9 mm'. A red circle with the number '3' is next to it.
- Notes**: A text area with a placeholder 'Notes'.
- Deactivate**: A checkbox with the label 'Deactivate' and a red circle with the number '4' next to it.

The background table shows a list of weapons with columns for ID, Brand, Model, and Serial number. The table has 7 rows of data.

ID	Brand	Model	Serial number
12	Glock	17	GL-1001
14	Glock	19	GL-1002
23	CZ	Shadow 2	CZ-2003
31	Sig Sauer	P226	SS-3004
36	Smith & Wesson	Model 686	SW-3605
42	Walther	GSP	WA-4206
47	Pardini	SP	PA-4707

The weapon form.

- 1 The ID is the label number and is required while the weapon is active.
- 2 Brand, model and caliber are suggested from earlier entries.
- 3 The serial is the weapon's legal identity and is unique.
- 4 Deactivate when the weapon is sold or retired — the ID can then be reused.

The ID (the label) may move to another weapon once it is free. The serial always stays with the same weapon and never changes.

6. Quick reference

Without a scanner

- Checkout, weapon first: type the weapon ID → tap the borrower → Check out.
- Checkout, member first: Manual choice → tap the member card → search by name. Their assigned weapon fills in; change it if needed → Check out.
- Unknown borrower: Manual choice → tap the member card → search by name.
- Visitor: Guest → personnummer and name → Continue.
- Check-in: find the card → arrow button. Or Quick check-in → weapon ID.

With a scanner

- Checkout, weapon first: scan the weapon → scan the member's personnummer. If that member is assigned the weapon or borrowed it last, the checkout completes at once.
- Checkout, member first: scan the ID card — the member's assigned weapon fills in (otherwise the last one borrowed, if it is in) → Check out.
- Unknown personnummer: the guest dialog opens with the number filled in.
- Check-in: scan the weapon — the loan closes at once.
- Scanning a weapon that is not out jumps to checkout.

Worth knowing

- The operator is logged out after a period of inactivity; pick the name again to continue.
- Nothing is deleted — members and weapons are deactivated, logs only grow.
- Debts and condition markings follow along and surface at the next checkout.
- The guide opens from the menu at any time.
